Data & BI Lead

- Own the data and BI strategy of a listed real estate company, in a data team of two: roadmap, priorities and backlog
- Established Microsoft Fabric on Azure as the data platform, connecting 10+ source systems through pipelines into one lakehouse
- Built a new treasury system for financial risk with stress tests of interest rate and funding scenarios, and an internal system giving an overview of the property portfolio
- Built 10+ Power BI dashboards for KPI tracking and decision support for the business, leadership and the board, and automated manual processes, freeing up several hundred working hours
- Build and maintain star-schema semantic models in SQL and DAX on top of the lakehouse
- Lead the AI/ML initiatives, from predictive models in Fabric to business processes and reporting
- Introduced a data governance framework with shared definitions and data quality standards
- Translate needs from finance, sustainability and operations into data products, from requirements to production
